## FORC3 partners with Calian to bring a world-class combat vehicle virtual training system to the Canadian Army

The FORC3 team, comprised of multiple Canadian industry-leading land defence solution providers, continues to develop its comprehensive solution for the upcoming Land Vehicle Crew Training System (LVCTS) program. As FORC3 prepares for the final stage of the proposal process, its partners are pleased to announce that Calian Ltd., a well-established integrated training solution provider, has joined the team.

Calian is a preferred provider within the Canadian defence community, as well as for NATO and numerous NATO allies. With over 25 years of experience delivering robust and relevant simulation and training services for the Canadian Army and NATO, Calian is on the forefront of innovative exercise design and execution solutions in a rapidly evolving defence environment.

In addition to its military training expertise, Calian is an industry leader in customized multi-domain data interoperability and integration support that enhances both learning and operational decision-making. With a range of products including the Virtual Command and Control Interface (VCCI) Tool Suite, Calian can federate multiple simulation, C4ISR, and AI-enabled data analytics systems to support cutting-edge training and deliver comprehensive after-action reviews.

### The FORC3 partnership

FORC3 includes leading Canadian defence, service, infrastructure, and simulation companies: Rheinmetall Canada (Saint-Jean-sur-Richelieu), Lockheed Martin Canada (Ottawa), the ADGA Group (Ottawa), Bluedrop Training and Simulation (Halifax), EllisDon Construction and Building Services (London), and REDspace Incorporated (Halifax). Now joined by Calian Ltd., the FORC3 team is strategically positioned to offer the very best training technology and develop Canada's exportable, industrial, and operational capability.

Collectively, the FORC3 partners currently operate more than 40 global training centres to Canada's key allies, including NATO and the Five-Eyes Alliance.

### ► Key facts

- Calian Ltd. has joined the FORC3 team in pursuit of Canada's Land Vehicle Crew Training System program
- Calian is a well-established provider of integrated training solutions within the Canadian defence community

“Calian complements FORC3’s technical and operational capabilities. We are very excited and confident that our combined solution and experience represents a compelling value proposition for the Canadian Army” says Pietro Mazzei, CEO of Rheinmetall Canada.

"Calian is thrilled to bring its advanced simulation and interoperability solutions to the forefront of the FORC3 partnership," stated Donald Whitty, President of Learning at Calian. "With our proven track record in designing and executing comprehensive, multi-domain training environments, we are uniquely equipped to enhance the operational readiness and effectiveness of the Canadian Army."
