### Major order worth over €300 million: Rheinmetall to supply armoured medical facilities for deployment near the front line

Rheinmetall has received an order from the Federal Office of Bundeswehr Equipment, Information Technology and In-Service Support (BAAINBw) to supply highly mobile medical facilities to the German Armed Forces. The framework agreement concluded in September 2025 has an initial call-off value of over €300 million. The first of

these protected, highly mobile medical facilities, which meet NATO Role 2B standards, is scheduled to be delivered to the Bundeswehr as a series model in 2029.

The systems are intended for use by the German brigade in Lithuania, among others. The contract will be implemented by Rheinmetall Project Solutions GmbH.

Each of the medical facilities consists of a total of eleven vehicles with associated multifunctional containers. The contract is valid until 2040 and allows for the ordering of additional systems.

The containers remain on the vehicles during operation. These are military HX trucks from Rheinmetall MAN Military Vehicles. This makes the medical facilities highly mobile and allows them to be deployed in national and alliance defence operations in line with the threat situation. Seriously injured personnel can thus be treated close to the front line. In terms of mobility and protection, there is currently no comparable system available in NATO.

With the Role 2B medical facilities now on order, the Bundeswehr will have a highly mobile, protected system for life-saving emergency surgery and intensive care in the immediate vicinity of mechanised land forces. 'This will enable us to provide our soldiers on the ground with the best possible medical care,' said Dr Deniz Akitürk, Managing Director of Rheinmetall Project Solutions GmbH.

### ► Key facts

- Rheinmetall to supply highly mobile, protected medical facilities (NATO Role 2B) to the German Armed Forces
- Value of six systems exceeds €300 million
- Delivery to begin in 2029
- Planned deployment includes German brigade in Lithuania
