► RHEINMETALL AT EUROSATORY 2026

10 June 2026

Strong and Clear – Across all Domains: Rheinmetall showcases its capabilities as an All Domain Power House at Eurosatory 2026 – from land to space

Under the motto “Strong and Clear – Across all Domains”, Rheinmetall will showcase its comprehensive portfolio of integrated capabilities for the multidimensional operations of the future at the Eurosatory 2026 trade fair. The leading systems provider will present solutions for networked effect generation across the land, air, sea and space domains, as well as the cyber and information domains.

Modern conflict scenarios require the seamless integration of actors, sensors, effectors, platforms and command and control capabilities. Rheinmetall pursues a holistic approach that combines digital networking, artificial intelligence, unmanned systems and classic core military capabilities into a resilient overall system. The aim is to achieve information and operational superiority in highly dynamic operational scenarios. To this end, Rheinmetall combines state-of-the-art sensor technology, digital command and control capabilities and scalable effectors along the entire chain of effects – from space-based reconnaissance to precision strikes on the battlefield.

Rheinmetall will be presenting a selection of its systems and capabilities for cross-domain operations at this year’s Eurosatory trade fair, taking place from 15 to 19 June 2026 in Paris. The event will feature numerous premieres:

- **Containerized Missile Launcher (CLM):** The modular multiple launcher for the FV-014 Loitering Munition System is part of Rheinmetall’s integrated reconnaissance and strike system. **We would be delighted to invite you to the world premiere on 15 June 2026 at 4.15 pm at our stand F115/F116.**
- **Lynx KF41 armoured reconnaissance vehicle with Counter-UAS kit:** The latest version of the Lynx KF41 contributes to battlefield transparency through its capabilities for Intelligence, Surveillance, Target Acquisition and Reconnaissance (ISTAR) missions. The new Counter Unmanned Aerial Systems kit enables the Lynx KF41 to detect and counter drones at an early stage
- **155 mm L60 gun system**, which is suitable for both wheeled and tracked self propelled howitzers and offers firing at long ranges.

► Key facts

- Rheinmetall will be exhibiting at Eurosatory 2026 in Paris from 15 to 19 June 2026
- Products and systems for all domains – land, air, sea, space, cyber and information
- We look forward to welcoming you at stand F115/F116 in the outdoor exhibition area

- **MK35-E**, a 35mm automatic cannon for infantry fighting vehicles and numerous other applications.
- **LongClaw**, a next-generation lightweight glide bomb designed specifically for deployment by drones.
- **HX81 Heavy Equipment Transport**: In collaboration with Nooteboom, the Rheinmetall Group offers a heavy-duty transporter for combat vehicles.
- **TG-Protected**, a protected logistics truck of the TGS-Mil 8x8 type based on a commercially available platform.
- **Caracal 6x6 air assault vehicle**: Developed in close collaboration with Mercedes-Benz and MAGNA I, the CARACAL 6x6 extends the proven W464 chassis with a third axle and a modular flatbed concept.
- **Komodo Unmanned Breaching System (UBS)**: The Komodo UBS unmanned breaching system combines Rheinmetall's extensive expertise in engineering with DOK.ING's proven unmanned platform technologies and Pearson Engineering's highly specialised clearance capabilities.
- **Hermelin cUAS drone defence system**, a modular hybrid platform that combines a reduced signature, long operational ranges and flexible mission adaptation in a future-oriented integrated system (manned-unmanned teaming) for the digitalised battlefield;
- **Kraken K3 Scout**: With the Unmanned Surface Vessel (USV) produced in series at Blohm+Voss, Rheinmetall, together with its British joint venture partner Kraken Technology, offers an unmanned surface platform for military and civilian applications.

Other Rheinmetall highlights at Eurosatory 2026 include:

- **Digitalisation and networking** to achieve information superiority and ensure a highly efficient, rapid and simplified closure of the ODA loop. Rapid command and control processes, supported by digitalisation and artificial intelligence, enable a swift and appropriate response to any threat;
- **Lynx KF41 Skyranger 30**, the modern anti-aircraft system with a 30mm machine cannon on tracks;
- **Fuchs JAGM**, the next-generation missile tank destroyer for engaging ground and air targets. It is the world's first vehicle equipped with 24 vertically launched guided missiles (AGM-179 Joint Air-to-Ground Missile or AGM-114L Hellfire Longbow from Lockheed Martin);
- **Destinus RUTA Block 2**, a modern cruise missile for deep-strike capabilities, which is to be produced in Unterlüß in collaboration with Destinus, starting later this year;
- **Ragnarok Mortar Mission Module**, a 120mm mortar system that can be integrated into numerous platforms and offers 'shoot and scoop' capabilities;
- **UGV Mission Master family**: as part of the accompanying live demonstrations, the new and improved Mission Master SP2 and the Mission Master CXT2 will demonstrate their versatile capabilities in combat support and protection;
- **Tactical HX Truck Family**, serving as the logistical backbone of NATO and its allies, or as a key capability provider for tactical applications, as well as supporting mast-mounted reconnaissance and communication tasks

Furthermore, at our stand we will be providing information on our activities in the field of ammunition expertise, logistical services in theatres of operation and on the home front, as well as our comprehensive protection expertise – ranging from passive armour to the Strike Shield active hard-kill system. We look forward to welcoming you to our stand F115/F116 in the outdoor area!
