The product portfolio of Rheinmetall Waffe Munition GmbH (RWM) includes weapon systems and ammunition in the fields of infantry, direct and indirect fire as well as pyrotechnics and protection systems. RWM specializes in the development and production of large-calibre weapon systems including the corresponding ammunition; these include, for example, the weapon system for the world's most powerful main battle tank, the Leopard 2, and the SMART 155 search fuze ammunition for artillery.
