Rheinmetall Oerlikon Skyranger 35 Turret at DVD 2024

The Rheinmetall Oerlikon Skyranger 35 (35x228) turret from Rheinmetall Air Defence will be showcased at Rheinmetall's DVD 2024 stand. This air defence weapon system is mountable on various wheeled or tracked platforms, fulfilling a typical VSHORAD role.

This highly mobile air defence system, equipped with integrated search and tracking sensors, serves as a powerful, autonomous shooter. It can engage modern battlefield threats, particularly focusing on small, unmanned aerial targets. It combines exceptional firepower with the dynamics and elevation required to effectively engage highly agile single or swarming targets executing loiter pop-up or dive attacks.

When paired with the Oerlikon Ahead air-burst ammunition, the gun achieves high effectiveness against the smallest targets.

Main features

- Mobile 35 mm air defence gun
- Effective combat range: up to 4,000 m
- 35 mm Oerlikon Revolver Cannon® KDG
- Nominal rate of fire: 1,000 rds/min
- Rapid single shot mode: 200 rds/min
- 35 mm x 228 Ahead air-burst ammunition
- Ready to fire ammunition: 252 rounds
- Integrated 360° AESA search radar and Ku-band tracking radar with a fully stabilized electro-optical sensor unit

You can view the Skyranger 35 Turret at Stand OR-15 at DVD on 18th & 19th September 2024

Notes to editors

Rheinmetall Electronics UK delivers high-performance embedded electronic solutions and operates from their headquarters based on the Isle of Wight in the south of England.

Rheinmetall Electronics UK provide Mission Systems to government, defence, security and communications customers. The offering also includes situational awareness systems for armoured vehicles, long range surveillance video processors and products for electronic warfare and cyber applications.
