

OERLIKON SKYRANGER® 30 WITH CHIRON

INTEGRATED MOBILE VSHORAD SOLUTION

A mobile air defence capability for the modern threat environment

The integration of LIG D&A's CHIRON missile with the Oerlikon Skyranger® 30 delivers a highly mobile air defence system combining active and passive search and tracking sensors with both gun and missile effectors. The system is designed to counter modern battlefield threats, with particular effectiveness against small unmanned aerial targets.

LIGHT MULTI-ROLE AIR DEFENCE SYSTEM

- Rheinmetall partnering with LIG D&A, a trusted provider of Korean defence technology
- Provides accuracy, mobility and mission flexibility in VSHORAD operations

CHIRON KEY FEATURES

- Compact, light and easy to operate
- Rapid deployment and withdrawal
- Fire-and-forget
- Neutralizes aircraft, helicopters and UAVs
- Day and night operation
- Precision Target Adaptive Guidance (TAG)
- Excellent IRCM performance with two-colour IR detector
- High terminal velocity through dual-thrust propulsion
- Enhanced lethality with proximity fuze and large warhead
- Arming key for safety and security, linkable with radio alerting systems
