

RN-300 with H & K 7.62 mm MG5

RN-300 – MG4/MG5

The RN-300 is a lightweight mount for MG4 and MG5 type weapons which incorporates a recoil damping system. An elevation and transport lock supports the operator during missions.

It significantly improves the handling of the weapons and increases the accuracy, the grouping and first hit probability.

The RN-300 has a standard NATO pintle and can be used on various tripods, vehicles and pedestals. The intended use is part of a weapon system providing capabilities for all critical and non-critical mission scenarios.

By using standard ammunition box interfaces as on the weapons, it can be mounted a wide variety of NATO 5.56 mm and 7.62 mm ammunition boxes.

Some advantages for the Gunner:

- Improved accuracy and grouping
- Rapid engagement of multiple targets
- Increased first hit probability
- Reduced recoil forces
- Improved ergonomics
- Easy maintenance
- The reduced recoil minimizes the wear and tear of the weapon
- Elevation can be fixed in level position
- Fixation during transport

- Simple mounting and use
- Reduces stress on carrying platform
- Elevation -30° up to $+60^{\circ}$

MAIN FEATURES

- Fits both MG4 and MG5 type of weapons
- Reduced recoil
- Standard NATO pintle interface (G3 cone)
- Applicable for land and navy operations – Salt water resistant
- Light-weight and clean design
- Ease of training – same interface for both MG4 and MG5 type of weapon
- Switching to MG4 or MG5 type of weapons without lose components within seconds
- Switching to 5.56 and 7.62 mm ammunition boxes without lose components within seconds

RN-300 with H & K 5.56 mm MG4
