

FAST INTERCEPTOR BOAT **FIB 25**

HIGH PERFORMANCE IN COASTAL WATERS

With a top speed in excess of 40 knots, the FIB 25 provides a fast response to any challenge. Its twin water jets configuration and shallow draught make the FIB 25 a highly manoeuvrable vessel and an ideal solution for operations along busy coastlines and riverways.

TAKING RESPONSIBILITY IN A CHANGING WORLD

PROVEN DESIGN WITH HIGH RELIABILITY

The FIB 25 has been in operation since 2011. It displays exceptional seakeeping characteristics and is fast and agile, even in congested waters. With continuous product development based on customer experience and feedback, the FIB 25 is affordable to procure, economical to run, and has a low through-life cost for maintenance.

ADVANTAGES AT A GLANCE

- Fast and highly manoeuvrable
- Exceptional seakeeping
- Cost-effective solution
- Customised layout
- Designed for operability and maintainability

Optional remote-controlled gun can be fitted on the foredeck

Exceptional manoeuvrability with twin water jets

Easy maintenance of machinery

Integrated wheelhouse control console with all-round visibility

DATA AND INFORMATION – FIB 25

General

Type	FIB 25
First of class	Mustaed
First commissioning	2011

Dimensions and Crew

Displacement	65 t
Length	27 m
Beam	6.2 m
Draught	1.2 m
Crew	11 (+2)

Propulsion

Diesel engines	2× MTU or MAN
Total power	Approx. 3,500 kW
Propellers	2× steerable
Speed	>40 kn

Capabilities

Border patrol and surveillance
Critical infrastructure protection
Law enforcement
Search-and-rescue

Sensors/Communication

Electro-optic surveillance camera
Navigation radar
GPS
Magnetic compass
Gyro compass
ECDIS
AIS
Speed log
Echo sounder
Autopilot

Communication

GMDSS Sea Area A1

Weapons

2× GPMG (optional)
1× remote-controlled 20–25 mm gun (optional)

Additional Capabilities

Range of 750 NM at 12 kn
Endurance of 72 hours
1× 4 m RIB
