

COMBAT LOGISTICS

LOGISTICS AND SERVICES
COMPREHENSIVE SUPPORT SOLUTIONS FOR
DEPLOYED OPERATIONS

MORE THAN 20 YEARS OF DEPLOYED OPERATIONS

Since 1999, Rheinmetall has been a trusted provider of camp services to armed forces around the world.

Following its first foray into maintenance support for Germany during the KFOR mission, Rheinmetall expanded its offering to include logistics, accommodation, catering, and laundry.

Soon, the company was receiving requests from allied forces for even more services. In 2009, the German Armed Forces tasked Rheinmetall with operating its newly fielded Uncrewed Aerial Vehicle (UAV) Heron 1 from Israel Aerospace Industries. And from 2009 until 2011, Rheinmetall maintained a tactical persistent surveillance system used by the Canadian Armed Forces in Afghanistan. Based on these experiences and its reputation for high performance, Rheinmetall was awarded a framework contract to accommodate deployed German troops in 2021.

Now, completing its Logistics and Services capabilities is Zeppelin Mobile Systems (ZMS), a world-renowned full-service provider of medical technology integration for tent- or shelter-based field hospitals and other environments.

FULL RANGE OF REAL-LIFE SUPPORT SOLUTIONS

Real-life support consists of all the services necessary to operate a military camp. These include catering, accommodation, water and energy supply, laundry services and waste management, transport and administration, and other amenities that enable a field camp's function.

Rheinmetall provides a full range of real-life support services to military partners worldwide, with each solution fully customized to the client.

CONSTRUCTION

Rheinmetall is capable of building and operating all the infrastructure necessary to a military camp. The setup may be tent- or container-based for shorter deployments or involve building long-term solutions.

CATERING

Rheinmetall provides state-of-the-art temporary and permanent catering facilities to deployed troops anywhere in the world. These high-quality, flexible catering solutions meet specific customer requirements regarding menu planning, dining experiences, and food supply chains, all while maintaining the highest levels of food safety.

CAMP SERVICES

Rheinmetall's camp services include laundry, waste management, water supply, black water handling, and energy production, with solar and other green solutions available. Through its partner ZMS, Rheinmetall also builds and operates field hospitals.

LOGISTICS

In collaboration with its worldwide network of suppliers, Rheinmetall meets its clients' logistical needs by road, air, and sea. These comprehensive services include long-term storage and ammunition management.

AIRFIELD SUPPORT

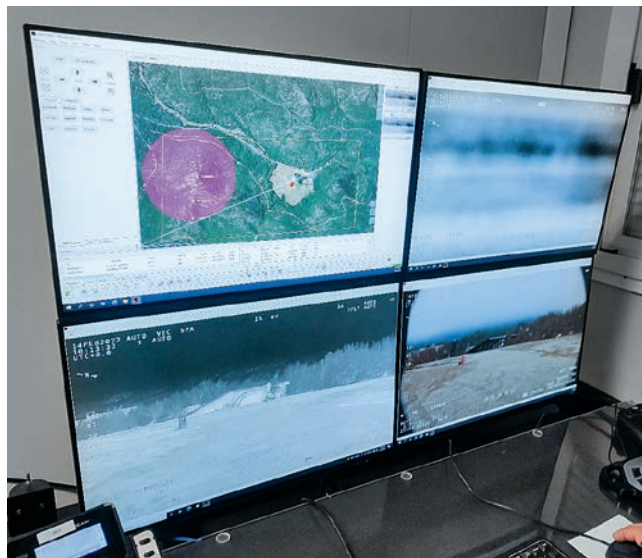

Rheinmetall's airfield ramp support offering includes fuel services, transportation, and aircraft loading and unloading.

CAMP PROTECTION

Rheinmetall provides multiple camp protection options, including both sensors and effectors. For surveillance, it recommends its Persistent Surveillance System (PSS).

These fully customized solutions can be strategic or tactical, depending on the client's operational needs.

PERSISTENT SURVEILLANCE SYSTEMS

Strategical PSS

- 24/7 operations
- Altitude: up to 1000 m
- Footprint: 80 x 80 m compound
- Detects vehicles 25 km away (day/night)
- Detects 1.8 x 0.5 m objects 20 km away (day/night)
- Identifies 1.8 x 0.5 m objects 5 km away (day/night)

Tactical PSS

- 24/7 operations
- Altitude: 300 m
- Footprint: 20 x 20 m
- Detects vehicles up to 20 km away (day/night)
- Detects 1.8 x 0.5 m objects 7 km away

MOBILE SYSTEMS

With its extensive experience and leading-edge production capabilities, Rheinmetall delivers high-quality, globally trusted shelter systems.

MEDICAL SOLUTIONS AND SERVICES

Rheinmetall has a wide range of medical solutions for land-based missions abroad. Its offerings include the infrastructure, equipment, and staff to operate medical care points and establish rescue chains. Rheinmetall's medical solutions include:

- Mobile clinics (vehicle-mounted)
- Field hospitals
- Turn-key systems complete with medical equipment, including high-end imaging technology such as computer tomography scanners.

In addition to mission support, Rheinmetall provides mobile medical infrastructures for rural areas and civil protection.
