

# ENGINEERING **VEHICLES**

**CREW CABINS WITH BALLISTIC AND  
MINE/IED-PROTECTION**

**PROTECTION OF ENGINEERING AND CONSTRUCTION MACHINES**

**TAKING RESPONSIBILITY** IN A CHANGING WORLD

 **RHEINMETALL**

### PROTECTED-CABIN CONCEPTS

Engineering and Construction vehicles are deployed in areas where the crew might be exposed to small arms fire and mine/IED threats.

Rheinmetall has realized several projects where complete protected crew cabins were developed and qualified according to customer specification. Qualification/certification tests are mostly done by Rheinmetall under supervision of a Third Party.

Mine blast test on excavator

### PRODUCTION OF COMPLETE CABINS

The protected cabins are produced ready for the installation on the respective engineering or construction machine.

### REALIZED PROJECTS

Complete protected crew cabins were delivered for various engineering and construction vehicles:

**Rheinmetall Protection Systems GmbH**

Pützchens Chaussee 58 a

53227 Bonn, Germany
