

KRYLA

DISTRIBUTED SATURATION STRIKE SYSTEM WITH COORDINATED MULTI-EFFECTOR ENGAGEMENT

Designed for high-volume strike, Kryla enables distributed saturation attacks to overwhelm air defence systems in contested environments through coordinated multi-vector engagement and time-on-target synchronization.

TECHNICAL DATA

Model	Kryla
Range	800+ km
Payload	50 kg

Counter

Integrated air defence

Stationary targets

Applications

SEAD (Suppression of Enemy Air Defence)

Remote saturation strike

Deep strike missions

MRASM

MAIN FEATURES

- Distributed strike and air defence saturation
- Time-on-target coordination and high-volume salvo
- Launch: air-drop (pallet) or booster-assisted canister launch (20-ft container)
