## Important new order: Rheinmetall takes over maintenance of German Air Force's CH-53G transport helicopter at Diepholz Air Base

Rheinmetall has won an order from the German Bundeswehr to inspect, maintain and repair Sikorsky CH-53G transport helicopters. Starting in March 2021, the Düsseldorf-based Group will be operating two maintenance and repair bays belonging to the German Air Force's 64<sup>th</sup> Helicopter Squadron at Diepholz in Lower Saxony. Worth a figure in the lower two-digit million-euro range, the contract with Rheinmetall Aviation Services GmbH runs for five years, with an option for a one-year extension.

In Diepholz, the 64<sup>th</sup> Helicopter Squadron is responsible for larger maintenance operations in a separate remote squadron, with a total of five Bundeswehr-owned maintenance and repair bays for the CH-53G – an aircraft that has been operated in the Bundeswehr since 1972.

An integrated high-tech enterprise dedicated to security and mobility, Rheinmetall's proposal won the tender, so that its subsidiary Rheinmetall Aviation Services GmbH (RAS) will soon be in charge of maintaining and repairing Bundeswehr helicopters in Diepholz. RAS will draw on organizational and aeronautical regulatory support from its sister company Rheinmetall Technical Publications GmbH, an approved aeronautical company located at Bremen Airport.

### About Rheinmetall Aviation Services:

Rheinmetall Aviation Services GmbH, which is also based in Bremen, was founded at the beginning of 2019 as part of the Group's strategic cooperation with Sikorsky in the Heavy Transport Helicopter (STH) procurement programme, with responsibility for maintenance, repairs, training and documentation. Rheinmetall and Sikorsky have been cooperating together intensively in various procurement projects since 2009. Thanks to the new order, expertise gained through this partnership will now be profitably put to work on behalf of the Bundeswehr in Diepholz. Looking ahead, the Bundeswehr also stands to benefit in the long term from the partnership between Rheinmetall and Sikorsky in the STH procurement programme, coupled with experience accumulated at Diepholz Air Base.

## ► Key Facts

- Rheinmetall to operate two CH-53G maintenance and repair bays at Diepholz Air Base starting in March 2021
- Order worth a figure in the lower two-digit million-euro range
- Contract runs for five years, with an option for an additional year
- Order positions Rheinmetall for the German Air Force's STH procurement programme
